

Appendices

All appendices referenced in the Community Health Needs Assessment (CHNA) report are included below and are also available online at [Inova.org](https://www.inova.org).

Appendix A: Community engagement

Summary of community outreach and engagement efforts

Appendix B: Community description

Detailed maps and tables exploring resident demographics and characteristics

Appendix C: Community conversations

Topics discussed during community conversations

Appendix D: Community survey

Communitywide survey results broken down by demographics

Appendix E: Community health status assessment results

Chart of health indicators used to identify disparities, trends and progress towards benchmarks

Appendix F: Top health issues methodology

Description of process and outcomes

Appendix G: Actions taken since the previous CHNA

Appendix A: Community engagement

The Fairfax CHNA gathered community input through two main methods – community conversations and a community survey. Community conversations bring together individuals who represent a diverse range of local community voices and champions. Participants included individuals with special knowledge of or expertise in public health; local public health departments; agencies with current data or information about the health and social needs of the community; representatives of social service organizations; business leaders and representatives; leaders and members of medically underserved, low-income and minority populations. Inova team members conducted community conversations with representatives from the Fairfax action committee, the Partnership for a Healthier Fairfax steering committee, local health departments, regional community health workers, the local federally qualified health center and a group of faith leaders from around the region.

The community survey was promoted to partners and residents. The survey was available in print and online in ten languages: Amharic, Arabic, Chinese (Mandarin), Dari, English, Farsi, Korean, Spanish, Vietnamese and Urdu. Printed copies were provided to partners and local clinics, as well as health department facilities. Community health workers assisted in the collection of print and electronic survey responses in their local communities.

Appendix B: Community description

This section identifies and describes the community that was assessed by Inova Fairfax Hospital and Inova McLean Ambulatory Surgery Center (hereafter referred to as the Inova Fairfax Hospital community). The community was defined by considering the geographic origins of the hospital's inpatient discharges and emergency department visits.

The Inova Fairfax Hospital community is comprised of 69 ZIP codes in Alexandria, Fairfax, Falls Church and Manassas cities and Fairfax Loudoun and Prince William counties that make up the primary and secondary service areas. For the purposes of the CHNA assessments, the Emergency Departments' service area (ZIP codes accounting for 75% of visits) was used to better represent the neighborhoods served by the hospital and surgery center.

Age

Population characteristics and changes directly influence community health needs. The total population of the Inova Fairfax Hospital community is expected to grow nearly 10% from 2025-2035. In that same time frame, the population 65+ is expected to increase by more than 41%. The growth of older populations is likely to lead to a growing need for health services, since on an overall per-capita basis, older individuals typically need and use more services than younger persons.

Figure B4. Percent change in population by age, Inova Fairfax Hospital community (2025-2035)

Age Cohort	Total Population			Percent Change	
	2025	2030	2035	5 year 2025-2030	10 year 2025-2035

Race and ethnicity

In Fairfax County in 2023 Asians, Hispanics and African Americans represented 19.9%, 17.4% and 9.8% of the county's population, respectively. Nearly one-quarter of the state's Hispanic population resides in Fairfax County (U.S. Census Bureau). Racial and ethnic diversity is increasing, as these groups are growing and the percent of the population that is White/Caucasian (excluding Hispanics and Latinos) is decreasing. Additionally, there are portions of the community with high percentages of residents who are foreign-born as well as households with limited English proficiency.

Education

Overall, the Inova Fairfax Hospital community is highly educated. In Fairfax County, 64.3% of residents 25 years and over hold a bachelor's degree or higher, with about one third of residents holding a graduate or professional degree. However, there are noticeable discrepancies within the County.

Health insurance

Prior to 2019 in Virginia, Medicaid was primarily available to children in low-income families, pregnant women, low-income elderly persons, individuals with disabilities and parents who met specific income thresholds. Adults without children or disabilities were ineligible.

In January 2019 Virginia expanded Medicaid eligibility to make healthcare more accessible for these populations. According to the Department of Medical Assistance Services, over 360,000 Northern Virginian's are enrolled in Medicaid in 2025.

Socioeconomic

Many health needs have been associated with poverty, unemployment and other socioeconomic factors. While most socioeconomic indicators in the Inova Fairfax Hospital community are favorable compared to Virginia overall, there are disparities by race/ethnicity, county/city and even census tract.

Food deserts

Food deserts are defined as low-income areas more than one mile from a supermarket in urban areas or more than ten miles from a supermarket in rural areas. Areas shaded in green are designated food deserts.

Figure B26. Food deserts, low income and low access, Northern Virginia, 2019

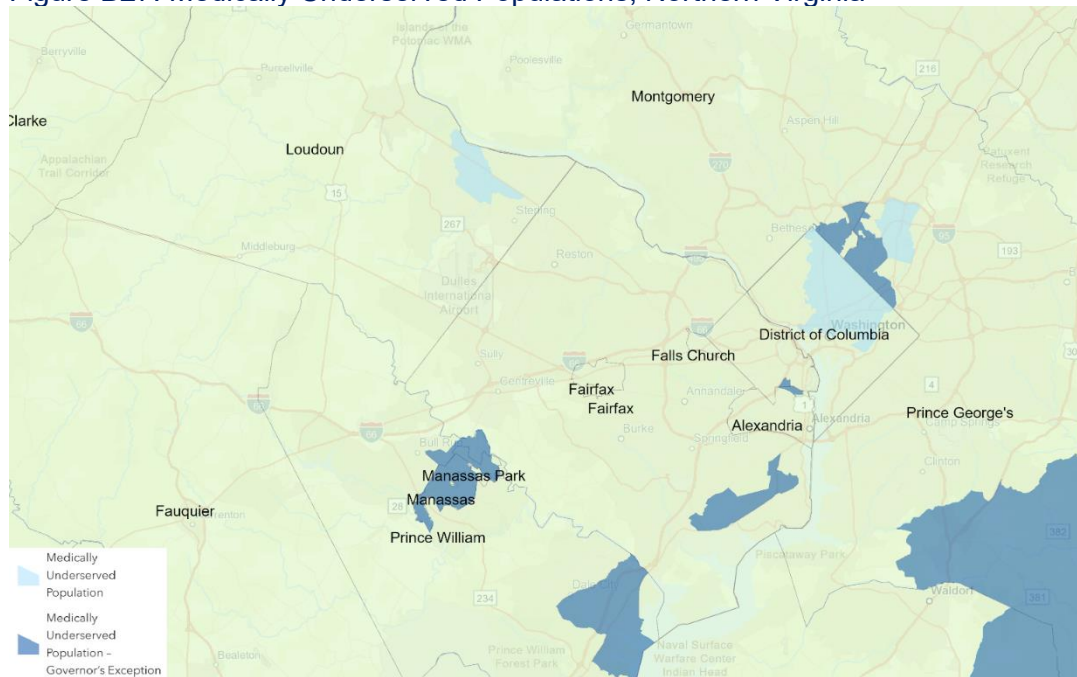

Source: U.S. Department of Agriculture
Accessed: July 29, 2025

Medically underserved populations

Medically Underserved Populations (MUPs) are designated by the Health Resources and Services Administration (HRSA). Populations receiving MUP designation include groups within a geographic area with economic, cultural or linguistic barriers to health care. There are multiple census tracts within the region that have been designated as areas where Medically Underserved Populations are present. In the Inova Fairfax Hospital community these areas fall primarily in Mount Vernon, Arlandria, Woodbridge, Manassas Park and South Ashburn.

Figure B27. Medically Underserved Populations, Northern Virginia

Resources

Federally Qualified Health Centers (FQHCs) are established to promote access to care in areas designated as “medically underserved.” These clinics receive enhanced reimbursement for Medicaid and Medicare services and most also receive federal grant funds under Section 330 of the Public Health Service Act. There currently are three FQHC organizations operating multiple sites in Northern Virginia.

In addition to the FQHCs, there are other clinics in the area that serve lower-income individuals. These include the Arlington Free Clinic (Arlington, VA), the Loudoun Free Clinic (Leesburg, VA), Culmore Clinic (Falls Church, VA) and multiple sites throughout the region of the George Mason University’s Mason and Partners Clinics.

In addition to these resources, Inova operates several Inova Cares Clinic sites across Northern Virginia. The local health departments also provide an array of services at locations throughout their jurisdictions.

Other community resources

There is a wide range of agencies, coalitions and organizations that serve the Fairfax region. Several organizations maintain large databases to help refer individuals in need to health and human services and resources to address social drivers of health. Resources available include:

Housing and utilities	Tax preparation assistance
Food, clothing and household items	Legal, consumer and financial management services
Food programs	Transportation
Health care and disability services	Employment and income support
Health insurance and expense assistance	Family support and parenting
Mental health and counseling	Disaster services
Substance abuse and other addictions resources	Government and community services
Support groups	Education, recreation and the arts

Appendix C: Community conversations

The Fairfax Community Action Committee, along with several other individuals, representatives and groups, participated in community conversations regarding the health of the community and opportunities to improve it. Data and findings from the previous CHNA were presented, and the participants were asked to share whether those data continue to feel relevant to the health of their community and what other factors are impacting health.

Figures C1 through C7 are a summary of their responses, organized by:

1. Categories: What health issues are impacted
2. Factors: What factors are affecting health in the community
3. Threats: What are the challenges posed
4. Opportunities: What are the opportunities presented

Figure C1. Fairfax Community Action Committee

Category	Factor	Threats posed	Opportunities created
Chronic conditions	<ul style="list-style-type: none"> • Rise in high blood pressure, diabetes and heart conditions • Delayed care leading to increased cancer diagnoses 	<ul style="list-style-type: none"> • Poor outcomes due to lack of regular monitoring and access 	<ul style="list-style-type: none"> • Volunteer cardiologist support • Expand chronic disease education and screening programs
Economic stability	<ul style="list-style-type: none"> • Housing affordability issues for refugees and older adults • 	<ul style="list-style-type: none"> • Increased stress and instability • Risk of eviction and income loss 	<ul style="list-style-type: none"> • Strengthen partnerships for housing support (e.g., Lutheran ministries) •
Education & health literacy	<ul style="list-style-type: none"> • Lack of awareness about available services and coverage • Language barriers in health education 	<ul style="list-style-type: none"> • Missed opportunities for care and prevention 	<ul style="list-style-type: none"> • Community conversations in trusted spaces • Expand multilingual education and outreach
Healthcare access	<ul style="list-style-type: none"> • Long wait times for specialty care (e.g. neurology) • Limited space in adult day centers 	<ul style="list-style-type: none"> • Delayed diagnosis and treatment • Unmet demand for screenings and services 	<ul style="list-style-type: none"> • Increase partnerships and volunteer support • Explore expansion of facilities and services
Mental health and substance use	<ul style="list-style-type: none"> • Mental health access for youth • Mental health worsened by climate, trauma, and systemic barriers • Telehealth limits privacy in multi-family homes 	<ul style="list-style-type: none"> • Unmet mental health needs • Avoidance of care and lack of trust • Under-resourced social services 	<ul style="list-style-type: none"> • VMAP support for co-managed pediatric mental health cases • Increase LCSW and LPC staffing • Use trusted community spaces for trauma-informed conversations
Obesity, nutrition and physical activity	<ul style="list-style-type: none"> • Pediatric obesity rising due to lack of nutrition support 	<ul style="list-style-type: none"> • Long-term health risks of poor dietary habits 	<ul style="list-style-type: none"> • Hire dedicated nutritionists • Integrate culturally relevant food education
Neighborhood, community & environment	<ul style="list-style-type: none"> • Climate change impacts: heat, wildfire smoke, mold • Little tree canopy in multi-family housing areas • Heat-related economic impacts for outdoor workers 	<ul style="list-style-type: none"> • Increased asthma, cardiovascular issues and mental health strain 	<ul style="list-style-type: none"> • Mason District Green Committee initiatives • Expand tree canopy and community gardens • Weatherization programs to reduce housing-related health risks

Appendix D: Community survey

Data for the community survey were collected through a tool (Figure D1) that asked participants for details about themselves, such as gender, race, income and ZIP code and their opinion about three main questions:

- What are the greatest strengths of our community?
- What are the most important health issues for our community?
- What would most improve the quality of life for our community?

Survey participants could select up to three choices for each question and leave open feedback in a freeform field. The survey was made available online and in paper format and was in the field from January through March 2025. Surveys were available in Arabic, Amharic, Chinese (Mandarin), Dari, English, Farsi, Korean, Spanish, Urdu and Vietnamese. This survey utilized a convenience sampling method; therefore, results from this survey are not generalizable to the entire community.

Because Alexandria and Prince William health departments were conducting community health assessments at the same time as this CHNA, the three surveys were coordinated such that data could be combined. Inova focused its survey collection on Fairfax and Loudoun counties while Alexandria City and Prince William County health departments surveyed their communities. Survey respondents provided their ZIP code which allowed responses from the Inova Fairfax Hospital community to be included and others to be excluded from the analysis.

Themes were identified in the survey in two ways. First, the overall results were reviewed; a survey response was considered a theme if it was in the top 5 of all responses (as shown in the CHNA Report). Second, the results were analyzed by respondent demographics to identify disparities and different perspectives. In this case, a survey response was considered a theme if it fell in the top five for that group.

Figure D1. Community survey

Northern Virginia Community Health Survey

Inova and our partners are conducting a short, anonymous survey to learn about what is important to people in Northern Virginia. The results will be used to inform ongoing efforts to make this a healthier community.

This survey is part of a larger health assessment that includes interviews, focus groups and data on the health of our communities. If you need more information, please visit <https://www.inova.org/CHNA>, contact us at CHNA@inova.org or call 703-698-2575.

1. In your opinion, what are the *greatest strengths* of our community?
Please select up to THREE (3) boxes below:

<input type="checkbox"/> Access to healthy food	<input type="checkbox"/> Inclusive access for people with disabilities (hearing, vision, intellectual, physical)
<input type="checkbox"/> Safe and affordable housing	<input type="checkbox"/> Clean, safe and healthy environment (clean air, stable climate, sanitation)
<input type="checkbox"/> Services that support basic needs (food, clothing, diapers, temporary cash assistance)	<input type="checkbox"/> Opportunities to be involved in the community (volunteerism, arts and cultural events)
<input type="checkbox"/> Educational opportunities (schools, libraries, vocational programs, universities)	<input type="checkbox"/> Welcoming diversity (social, cultural, faith, economic) and addressing racism and biases
<input type="checkbox"/> Jobs and a healthier economy	<input type="checkbox"/> Access to parks, recreation, walkable/bikeable neighborhoods
<input type="checkbox"/> Transportation options	<input type="checkbox"/> Access to accurate sources of health information
<input type="checkbox"/> Access to healthcare and public health services	<input type="checkbox"/> Other (please specify):
<input type="checkbox"/> Access to vaccines	
<input type="checkbox"/> Mental health and substance use services	
<input type="checkbox"/> Public safety (law enforcement, fire, rescue services)	

2. In your opinion, what are the biggest health issues in our community?
Please select up to THREE (3) boxes below:

<input type="checkbox"/> Aging-related health concerns (dementia, arthritis)	<input type="checkbox"/> Mis/Disinformation about health issues
<input type="checkbox"/> Chronic health conditions (cancer, diabetes, heart disease, stroke, asthma)	<input type="checkbox"/> Tobacco use (cigarettes, vaping, e-cigarettes, snuff, chewing tobacco)
<input type="checkbox"/> Illnesses spread by insects and/or animals (Lyme West Nile, malaria, Zika, rabies)	<input type="checkbox"/> Alcohol, drug, and/or opiate abuse (including overdose)
<input type="checkbox"/> Illnesses that spread from person to person (flu, COVID-19, TB, Mpox, measles, HIV, STDs/STIs,)	<input type="checkbox"/> Mental health (depression, anxiety, stress, self-harm)
<input type="checkbox"/> Preventable injuries (car/bike crashes, falls, poisoning)	<input type="checkbox"/> Obesity
<input type="checkbox"/> Violence and crime in the community	<input type="checkbox"/> Food and water quality and safety
<input type="checkbox"/> Domestic violence, rape/sexual assault, child abuse	<input type="checkbox"/> Differences in life expectancy and health outcomes based on race, ethnicity, and economic well-being
<input type="checkbox"/> Dental problems and access to dental care	<input type="checkbox"/> Other (please specify):
<input type="checkbox"/> Maternal, infant, child, youth and teen health	

3. In your opinion, what would *most improve health* in our community?
Please select up to THREE (3) boxes below:

<input type="checkbox"/> Access to healthy food	<input type="checkbox"/> Inclusive access for people with disabilities (hearing, vision, intellectual, physical)
<input type="checkbox"/> Safe and affordable housing	<input type="checkbox"/> Clean, safe and healthy environment (clean air, stable climate, sanitation)
<input type="checkbox"/> Support for basic needs (food, clothing, diapers, temporary cash assistance)	<input type="checkbox"/> Opportunities to be involved in the community (volunteerism, arts and cultural events)
<input type="checkbox"/> Educational opportunities (schools, libraries, vocational programs, universities)	<input type="checkbox"/> Welcoming diversity (social, cultural, faith, economic) and addressing racism and biases
<input type="checkbox"/> Jobs and a healthier economy	<input type="checkbox"/> Access to parks, recreation, walkable/bikeable neighborhoods
<input type="checkbox"/> Transportation options	<input type="checkbox"/> Access to accurate sources of health information
<input type="checkbox"/> Access to healthcare and public health services	<input type="checkbox"/> Other (please specify):
<input type="checkbox"/> Access to vaccines	
<input type="checkbox"/> Mental health and substance use services	
<input type="checkbox"/> Public safety (law enforcement, fire, rescue services)	

Flip Over

Please answer the following questions.

We ask a few questions about you so we can understand more about who took this survey.
Thank you for participating in this anonymous survey!

4. What is your AGE?

Please write in: _____

5. What is your HOME ZIP CODE?

Please write in: _____

6. What is your ANNUAL HOUSEHOLD INCOME?

Please choose ONE (1) box:

- ☐ Less than \$25,000
- ☐ \$25,000 - \$49,999
- ☐ \$50,000 - \$99,999
- ☐ \$100,000 - \$124,999
- ☐ \$125,000 - \$199,999
- ☐ \$200,000+
- ☐ Prefer not to say

7. What is your HIGHEST LEVEL OF EDUCATION?

Please choose ONE (1) box:

- ☐ Less than high school diploma
- ☐ High school diploma / GED
- ☐ Some college
- ☐ Associates / Technical degree
- ☐ Bachelor's degree
- ☐ Graduate degree or higher
- ☐ Prefer not to say

8. Which RACE/ETHNICITY best describes you?

Select ALL THAT APPLY:

- ☐ American Indian or Alaska Native
- ☐ African
- ☐ East/Southeast Asian
- ☐ South Asian
- ☐ Black or African American
- ☐ Hispanic/Latino
- ☐ Middle Eastern or North African
- ☐ Native Hawaiian or Other Pacific Islander
- ☐ White
- ☐ Another race/ethnicity _____
- ☐ Prefer not to say

9. Where do you USUALLY GET HEALTHCARE?

Select ALL THAT APPLY:

- ☐ Hospital / emergency room
- ☐ Doctor's office
- ☐ Urgent care center
- ☐ Free or reduced-fee clinic
- ☐ Veterans Administration
- ☐ Other healthcare setting: _____
- ☐ I don't get healthcare
- ☐ Prefer not to say

10. What COUNTRY were you born in?

Please write in: _____

11. What is your FIRST/PRIMARY LANGUAGE?

Please write in: _____

12. Which GENDER IDENTITY best describes you?

Select ALL THAT APPLY:

- ☐ Woman
- ☐ Man
- ☐ Transgender
- ☐ Nonbinary
- ☐ Prefer to describe: _____
- ☐ I don't know
- ☐ Prefer not to say

13. What is your SEXUAL ORIENTATION?

Select ALL THAT APPLY:

- ☐ Asexual
- ☐ Bisexual
- ☐ Gay or Lesbian
- ☐ Straight or Heterosexual
- ☐ Prefer to describe: _____
- ☐ I don't know
- ☐ Prefer not to say

4	Access to healthy food	65
5	Jobs and a healthier economy	53

Appendix E: Community health status assessment

The health indicators that comprised the community health status assessment were selected based on best practices, availability and local knowledge of emerging health issues. The data include rates and percentages of mortality, morbidity, incidence and prevalence (death, chronic illness and new and existing disease). Data were compiled from published secondary sources available in March 2025. The Virginia Plan for Well-Being's Virginia Community Health Improvement Data Portal collects these resources into a platform that can be used to generate data and maps of local metrics. This tool, developed by the Virginia Department of Health, was launched in September of 2022 and was invaluable to the development of this assessment.

County-level data, as well as breakdowns by population characteristics, was not consistently available, which means the amount of information within certain health topics may be limited. Specific indicators were selected and compiled to support a broad picture of health in the Inova Alexandria Hospital community and may not encompass all data available.

Figure E1 lists the data sources for Figure E2, which provides an overview of much but not all of the data considered. Please contact Inova for more information.

Figure E1. Community health status assessment data sources

Data Source	Abbreviation
American Community Survey	ACS
Centers for Disease Control and Prevention	CDC
CDC Behavioral Risk Factor Surveillance System	CMS
Centers for Medicare and Medicaid Services	CMS
County Health Rankings	CHR
Health Resources and Services Administration	HRSA
Small Area Health Insurance Estimates, Census	SAHIE
Virginia Behavioral Risk Factor Surveillance System	VA BRFSS
Virginia Department of Education	VDE
Virginia Department of Health	VDH
Virginia Health Information	VHI

Figure E2. Community health status assessment data

Appendix F: Identifying top health issues methodology

As described throughout this document and the CHNA Report, each of the three assessments identified areas of concern. Community health needs were determined to be “top health issues” if they were identified as a concern in at least two of the three assessments. An assessment scoring matrix was developed to visualize these results. Figure F1 shows this matrix for the Inova Fairfax Hospital community.

Figure F1. Inova Fairfax Hospital community assessment scoring matrix

Health issue	Survey theme	Assessment theme	Conversations theme
Chronic conditions (stroke, heart disease, hypertension, cancer, diabetes, asthma, arthritis)	X	X	
Economic stability (income inequality, poverty, unemployment, housing costs, transportation access)	X		X
Education and health literacy (school climate, graduation rates, college, information sources)		X	X
Healthcare access (insurance coverage, avoidable hospitalization, screening tests, access to medical care)	X		X
Infectious disease and immunization (infectious disease incidence, immunization rates)	X		
Injury and violence (accidental injury, motor vehicle collision, intentional injury, poisoning)		X	
Maternal, infant child and youth health (infant mortality, maternal mortality, birth rate among adolescents, prenatal care)		X	X
Mental health and substance use (depression, poor mental health days, substance use disorder, overdose, self-harm, suicide)	X	X	X
Neighborhood, community and environment (social vulnerability, commuting, pollution)			X
Obesity, nutrition and physical activity (obesity, food insecurity, physical activity)	X		

Using this framework, the top health issues identified for the Inova Fairfax Hospital community are: **chronic conditions; economic stability; education and health literacy; healthcare access; maternal, infant child and youth health; and mental health and substance use.**

Appendix G: Actions taken since the previous CHNA

This appendix discusses community health improvement actions taken by Inova since its last CHNA reports were published in 2022 and based on the subsequently developed implementation strategies. The information is included in the 2025 CHNA reports to respond to final IRC 501(r) regulations.

Members of the Community Health Division, Inova leadership, Inova Fairfax Hospital, Inova McLean Ambulatory Surgery Center, Fairfax County Health Department and community partners have been working diligently on the priority areas set forth in the 2022 CHNA Implementation Strategy.

Inova maintained the structure that was established in 2020 in the midst of the COVID-19 pandemic for administering the CHNA and implementation planning. A steering committee addresses system-wide approaches to improving CHNA-identified health needs, and the Fairfax Community Action Committee consisting of Inova team members and community partners identifies local needs and opportunities and develops partnerships to address them. The Steering Committee meets monthly to identify needs and opportunities throughout the system and the community. The Action Committee also meets monthly and brings together representatives from multiple Inova departments, faith-based organizations, mental health stakeholders, community partners including but not limited to ADAMS Compassionate Healthcare Network, Aetna, CareFirst BlueCross BlueShield, Culmore Clinic, George Mason University Place-Based Initiative, Insight Memory Care, Neighborhood Health, Northern Virginia Family Services, Fairfax County local government teams (Health Department, Neighborhood and Community Services, and Fairfax County Public Schools) and community members who reside in Fairfax neighborhoods.

Inova is a partner of the county's Community Provider Strategy Team (CPST), formerly the Community Provider Coordination Team (CPCT), and participates on numerous subcommittees related to health access, food and communication. As Fairfax County completed its Community Health Assessment and began its community health improvement planning, Inova team members participate in four workgroups designed to hone the plan going forward.

Inova in the Community

Local action committee conversations in Fairfax and across Northern Virginia brought to light the need for Inova to have an ongoing presence in and engagement with its local communities to continue to build trust. A tool was developed to collect information from Inova team members with interest in sharing their expertise at community events and activities. Rather than create events, Inova, guided by our Community Health Workers, works with local non-profit, faith, clinical, government and neighborhood partners to collaboratively deliver resources at events and activities designed and attended by community members. Inova team members volunteer their time and expertise at a variety of events including health fairs, health education sessions, workforce development opportunities and community celebrations. In Fairfax, this included participating in events with the public schools, houses of worship, partner organizations and local colleges. Inova team members provide education, navigation and screening opportunities in a variety of these settings, such as Lorton Community Action Center's March into Better Health Event, Culmore Clinic's Community Day Fair, Crossroads Baptist Church's health fair and Vienna Seventh-Day Adventist Church's health fair.

Inova and partners recognize that to improve healthcare access it is important to improve awareness of existing community resources. Reaching under-resourced communities with messaging about services

requires tailored approaches and have included the use of community health workers, trusted messengers and popular opinion leaders, multi-lingual and multi-cultural outreach, targeted social media campaigns and interagency partnerships and cross-promotion. All the Inova Community Health clinics and programs have their own websites and educational and outreach materials. A universal one-page resource document with information about all of Inova's clinics and programs for under-resourced individuals is maintained in English and Spanish for use when attending community events and connecting with partners.

Inova team members serve as members of numerous committees across the region sharing their expertise and related work to address health access, food insecurity, workforce development and more. A few of these subcommittees include the Partnership for a Healthier Fairfax, Culmore Clinic's Place Based Investment Initiative, Northern Virginia Regional Health Services Coalition, Fairfax Food Council, Healthy Families Advisory Council, Medical Care for Children Partnership Foundation, Northern Virginia Oral Health Alliance, Virginia Foundation for Healthy Youth, Virginia Community HIV Planning Group, Washington DC Regional Planning Commission on Health and HIV, Coordinated Council on Aging and Adults with Disabilities and Northern Virginia Dementia Care Consortium.

Community Health Workers

Inova is a member of the Virginia Hospital & Healthcare Association and participated in its HealthBegins cohort to use health disparity data to drive interventions in 2020. This partnership led to increased interest in the use of Community Health Workers to coordinate with patients and communities to promote wellness, improve access and address social drivers of health. In 2023, CHWs were embedded in all Inova Cares clinics, located in regions with high rates of health disparities. CHWs assist patients to stay connected to care and to address their social needs while also being present in communities to foster trust and collaboration with the healthcare system.

The value of CHWs is increasingly appreciated across the healthcare system. Inova Fairfax's Hospital Violence Intervention Program is run by CHWs with lived experience relevant to their patients' care. Inova Schar Cancer Institute's Cancer Prevention Outreach Program is also staffed with CHWs who make connections with partners and communities they serve. In 2024, a CHW began working in the Inova Mount Vernon Emergency Department to address an increased need for social drivers of health navigation for patients with upstream concerns impacting their health and leading to more emergency room visits.

In 2023, the Northern Virginia Community Health Access Forum was formed to support Northern Virginia's network of CHWs and navigators as identified as an area of focus in the CHNA. While state-wide consortia existed for CHWs, no such groups existed specifically for those working in Northern Virginia to discuss the unique barriers and opportunities they face. Inova team members facilitate the forum and create opportunities for networking and the sharing of resources between CHWs, navigators, neighborhood ambassadors and community gatekeepers across Northern Virginia. During monthly meetings, speakers present key health topics and introduce local non-profits, fostering collaboration to breaking down silos and connect people with lived experiences to resources that serve their communities.

Expansion of Community Health Clinics and Programs

Inova continued to grow its community presence through the expansion of clinics and programs into

specific neighborhoods throughout Northern Virginia. Inova Community Health currently has 31 clinics and numerous outreach and engagement programs.

Inova expanded pediatric services in 2023 by co-locating Inova Cares for Children (ICC) at the Inova Cares for Families (ICF) locations in Alexandria, Fairfax, Manassas, Sterling and Herndon. These expanded services include a dedicated pediatrician and a specially trained support team. ICC offers comprehensive pediatric services for children on Medicaid or without insurance. Spaces are designed to encourage connection and foster conversations among parents, caregivers and providers.

Also in 2023, Inova expanded services and renamed the OB-GYN clinic at Inova Loudoun Hospital to Inova Cares for Women (ICW) - Lansdowne. The clinic was established in 2008 as a partnership between Inova Loudoun Hospital and the Loudoun County Health Department to improve birth outcomes and reduce NICU stays among uninsured and low-income women. In 2023, ICW – Lansdowne added gynecologic services for patients, including those referred from the emergency room, and family planning.

Inova opened the first Inova Cares pediatric sick clinic in 2024, providing new levels of access to same-day care for children and families throughout Northern Virginia. Co-located with Inova Cares for Children – Falls Church, the clinic fast-tracks existing patients who have fevers, ear infections, sore throats or other common ailments to get the care they need to return to daycare or school as soon as possible. Parents and caregivers can bring children directly to the clinic without an appointment to receive immediate care, avoiding a trip to the emergency room.

ICF and the Inova Juniper Program (IJP) opened their Mount Vernon location in October of 2023 as a result of Inova's Mount Vernon Community Health Needs Assessment identifying healthcare access as a top unmet need in the Mount Vernon area. These clinics create medical homes in the community to improve access, address healthcare needs and foster long-term wellbeing.

Additionally, two ICF clinics expanded their sites in 2025 to meet the significant growth in need in the communities they serve. The Herndon location moved to an expanded site that ensures patient access is aligned with community needs as identified in prior CHNAs. By co-locating Inova Cares for Women, Children, and Families and Inova Juniper Program, patients can receive care for the whole family at a single location. The Annandale site saw significant patient growth over the last decade and anticipates serving more patients with the new expansion.

Inova and Loudoun County Public Schools (LCPS) partnered to develop onsite mobile health services with shared staffing for uninsured students in need of school physicals and wellness checks. Together, Inova nurses, Inova's bus driver, George Washington University student nurses, an LCPS nurse practitioner and LCPS administrative team members launched the LCPS Mobile Health Clinic in June 2023. Students and families receive health services on the Inova mobile unit and receive navigation assistance to establish a permanent medical home.

Inova Cares clinics have partnered with Inova Schar Heart and Vascular to embed cardiologists who can provide onsite screening and treatment with the goal of reducing the risk of high blood pressure, diabetes, heart disease and stroke. This service launched at the Sterling location which serves primarily eastern Loudoun and western Fairfax communities and is expected to expand next to ICF - Mount

Vernon. These two locations were selected based on data regarding cardiac risks and outcomes in the communities they serve.

All Inova facilities provide financial assistance in accordance with Inova policies which ensure access to medically necessary care for all individuals. Charity care is defined as free or discounted healthcare services provided to those who cannot afford to pay. Inova's Financial Assistance Policy provides 12 months of coverage to anyone living in Virginia at or below 400% of the federal poverty level. Many of these individuals receive their primary care at the Inova Cares clinics where wrap-around services, including community health workers, can help them with obtaining the resources they need to thrive.

Community Health Partner Support

Every year Inova provides Community Health Opportunities grants to non-profit organizations in Northern Virginia providing services aligned with the CHNA. Applicants are asked to provide a brief overview of their organization's connection to the communities they serve and a description of the services they would provide if awarded. In addition to these awards, numerous local nonprofits are colocated with Inova services and receive additional support. Between 2023 and 2025 approximately \$3.9 million in grants and support were provided to over 60 partners.

Recipients that support the Inova Fairfax Hospital Community include:

2023 recipients: Act for Alexandria, Adaptive Fitness Legion, Cornerstones, Culmore Clinic, The Growth and Healing HUB, Hamkae Center, The House Inc., LAZERA Ministries, Loudoun Education Foundation, Main Street Child Development Center, Northern Virginia Dental Clinic, SafeSpot Children's Advocacy Center, Shepherd's Center of Fairfax-Burke, Stroke Comeback Center and United Community.

2024 recipients: Afghan-American Women's Association, Alexandria Seaport Foundation, True Ground Housing Partners, Carpenter's Shelter, Girls on the Run NOVA, Just Neighbors, Learn & Live Wholistic Health Services, Kitchen of Purpose, Lorton Community Action Center, Loudoun Hunger Relief, Medical Care for Children Partnership Foundation, Planning for Senior Life, Prevention of Blindness Society, Centers for Opportunity, Ryan Bartel Foundation, Shepherd's Center of Northern Virginia, The Chris Atwood Foundation, The Fenwick Foundation, Wesley Housing and Women Giving Back.

2025 recipients: Adaptive Fitness Legion, Capital Area Food Bank, Cornerstone Craftsman, Fellowship Square Foundation, Friends of Guest House, George Mason University Foundation, Inc., Hispanics Against Child Abuse and Neglect, Inc., Insight Memory Care Center, Korean Community Service Center of Greater Washington, LAZERA Ministries, Marie Maxey Foundation, Move2Learn, NAMI Northern Virginia, Nueva Vida, Inc., Real Food for Kids, Second Story, Shelter House, Inc., STEM for Her, The Lamb Center, The Spitfire Club and United Community.

Social Drivers of Health Screening

In 2021, Inova adopted an SDOH screening tool made up of validated questions assessing need in a wide array of social drivers. The project brought together teams representing all aspects of the Inova workforce to determine how the tool and resulting patient responses should be presented, who it should be available to and what was necessary to begin socializing its use. Inova socialized the tool in all inpatient and outpatient settings and utilizes tracking dashboards to help departments visualize their successes and opportunities in collecting this information. Information available on Inova's intranet

helped teams develop approaches to data collection via a variety of mechanisms, including directly from patients and via Inova's online MyChart patient portal.

In addition to helping with the support of individual patients, robust SDOH data can now be used to help inform clinical and community care. Using these data, approaches are created to address top SDOH needs including intimate partner violence, transportation and food insecurity. These workflows can be tailored to the needs of individuals being served in a variety of Inova settings. Data also help predict patient needs, barriers and outcomes, allowing for better insights when developing interventions, designing resources or establishing outreach programs. SDOH screening and interventions are now built into care models, ensuring a whole-person approach to care.

In April 2023, Inova rolled out the Unite Us/Unite Virginia platform for active referrals to social services and non-profit partners. Over 7,000 team members across the Inova system have the ability to make referrals to community partners from the electronic medical record. Several of Inova's community health clinics and programs also accept referrals from the community through the platform. Inova is working closely with community partners to assist in adoption of the platform throughout the non-profit landscape, creating a robust referral network. This critical collaboration provides a closed loop solution for Inova team members using the SDOH screening tool, providing easy access to refer patients to multiple community resources that can address social drivers of health.

The network has grown since Inova began using the platform, in part due to education and partnership Inova sought with non-profits and funders. Recipients of Inova's grant support are encouraged and supported to join the network, opening referrals both to and from Inova and other partners. Inova joined several philanthropic organizations in Loudoun County to create a stipended community of practice which helped 13 non-profits serving Loudoun and Fairfax join the network in a collaborative learning environment with thoughtful workflows.

To support patients experiencing food insecurity, Inova maintains emergency food pantries in more than ten locations through partnerships with regional food banks and donors. The pantries are in locations, like the Inova Cares clinics, that serve patients experiencing food insecurity to address immediate needs. In 2024, Inova opened its first inpatient food pantry for food insecure patients at Inova Alexandria Hospital. Upon receiving emergency food from these pantries, patients are referred through Unite Us to local food partners and pantries to ensure continuous access to food.

Creating a Community Based Workforce

Inova's community-based workforce development initiative, Dream BIG, aims to ensure the healthcare workforce reflects and represents the communities Inova has the privilege to serve. The program was created in 2021 and gives under-invited youth an up-close look at a variety of healthcare careers and roles. Inova team members from many backgrounds and professions – known as the Dream Team – created short videos highlighting their career journeys. Team members visit Title 1 middle and high schools in Northern Virginia to show the videos, share their work-life experiences and invite students to visit the healthcare setting. The goal is to inspire young people to visualize their own healthcare career success stories.

The Inova Community Health team and Inova Talent Acquisition's Workforce Development team partner to develop resources for youth and adults who aspire to a healthcare career. Information shared at Dream BIG workforce activities includes outlines of positions that do not require post-secondary education, career ladder opportunities and tuition assistance at Inova. These materials can help

students determine next steps after high school, as well as offer adults opportunities to join the healthcare field. This approach provides community members with career opportunities and economic stability while providing Inova with a responsive and representative workforce.

Inova organized a series of job pairing events beginning in 2024 for community members eager to explore healthcare career opportunities. In collaboration with Crossroads Jobs, the WISH Center, Bridges to Independence and other community partners, Inova brought personalized career coaching and development directly to partner facilities, providing invaluable and convenient support to job seekers. These efforts aimed to empower individuals with the tools and knowledge they need to successfully navigate the healthcare job market, fostering growth and opportunity for all participants.

In October 2024, Inova convened regional workforce partners to initiate a coordinated effort to improve health and life sciences career awareness and education. Together with the Claude Moore Charitable Foundation, the Northern Virginia Healthcare Workforce Collaborative will facilitate and communicate pathways designed to build a workforce to meet the ongoing healthcare needs of Northern Virginia and create economic stability for its communities. The collaboration brings together public schools, higher education, healthcare employers and more to work collectively to enhance Northern Virginia's healthcare and health sciences talent pipeline.

In 2025, Inova Dream B!G hosted 2 career development seminars for adults. These programs aimed to engage and inform the community regarding several healthcare career pathways. Each day included sessions on interview skills, resume writing, and financial literacy, as well as face-to-face interaction with a wide range of healthcare professionals from different roles.

Inova Community Health has an established a partnership with the Fairfax County Health Department's Public Health Youth Ambassador Program (PHYAP) to provide community-based training and experiential opportunities for Fairfax County Public High School students with low-income backgrounds. Community Health Workers and team members from Inova Cares for Families provided experiential experiences for students to supplement computer-based learning modules. Graduates of the Public Health Youth Ambassador Program receive a certificate of completion from Morehouse School of Medicine's High School Community Health Worker Program, a scholarship, resources they need to participate in the program.

Dream B!G has partnered with Fairfax County Public Schools, George Mason University's Early Identification Program, PHYAP and more to provide hands-on activities and tours of Inova Fairfax Hospital. Middle and high school students visited with team members in the Advanced Surgical Technology and Education Center, experienced virtual reality based training in the Inova Center for Advanced Medical Simulation, observed the respiratory system with pig lungs, engaged in neuroscience and injury and prevention activities and practiced physical exams with University of Virginia medical students. Their visits included small-group roundtable discussions with team members from across the hospital to discuss educational backgrounds and career journeys. Team members provided ad-hoc mentoring about their day-to-day operations and advice for students as they plan their next steps.

In 2024, prior Dream B!G students were offered the opportunity to join a mentorship cohort focused on career pathways to becoming physicians, nurses, pharmacists and technicians. Students were grouped into pods based on their interests and met with Inova team members in those careers. In addition to two in-person events, Inova team members connected with the students via email, phone and meetups throughout the year.

In 2025, Dream B!G expanded its reach and hosted hands-on activities at various school sites throughout Northern Virginia to allow for more students to participate. Inova's cardiology, neuroscience, and pediatric multispecialty departments helped pilot the approach. These nimble teams were able to bring hands-on experiences and open conversations to high school students in the comfort of their classrooms.

Healthcare Worker Education

Since 2019, Inova has hosted the annual Healthcare Disparities Conference, which provides attendees with unique perspectives on how to identify and reduce disparities in patient outcomes and experience.

In October 2023, the Fifth Annual Healthcare Disparities Conference championed "A Call for Connection: Cultural Humility and Allyship." Keynote speaker Ijeoma Nnodim Opara, MD, FAAP, FAIM, of Wayne State University, shared a rousing call for cultural humility and health justice. The day included vignettes and storytelling regarding creating brave spaces and addressing healthcare barriers by reframing the patient experience through the lens of SDOH.

In October 2024, Inova and partners presented the Sixth Annual Healthcare Disparities Conference titled: "A Call for Commitment." This event reached more than 425 healthcare workers and community partners across Northern Virginia and throughout the United States with storytelling framed around identifying disparities and implementing strategies to address them while staying motivated to improve the healthcare experience for patients, families and healthcare teams.

The seventh annual conference in September 2025 was titled: "A Call for Innovation." Through real-world examples and local strategies, speakers will showcase the power of data-driven insights and intentional use of artificial intelligence to reduce disparities and deliver care that is responsive to the needs of patients, families and care teams.

The Community Health Division serves as a training site for medical residents, involving placement at ICW, ICC, ICF and Lions Eye Clinic. The team plays a central role in shaping the next generation of healthcare providers through hands-on clinical education and mentorship. Additionally, residents receive lectures on community health programs and local resources, ensuring they are well-equipped to support patients both inside and outside the clinics.
